Forecast for Wednesday 14 Jun 2023

Weather: Any early mist will clear quickly through the morning, leaving a fine day with plenty of prolonged strong sunshine. Some fair weather cloud may bubble up during the afternoon, with a very small chance of an isolated shower, but staying dry for most. Remaining dry into the evening with some patchy mist forming again in some valleys.

Chance of cloud-free hill tops above 600m: Generally greater than 95%.

Low cloud and visibility: Any early mist may briefly cover slopes and tops as it lifts and clears after dawn. Very little cloud during the morning, and any cloud during the afternoon will be above all summits. Good to very good visibility, with uninterrupted panoramic views, although briefly moderate or poor in any early mist.

Meteorologist's View

With very high UV levels it is important to be prepared by wearing, and taking, plenty of protective clothing. With further warm weather and high humidity levels, plenty of water will be required as lengthy exposure to strong sunshine and high temperatures can cause exhaustion and dehydration.
